Point of care solutions.

convergint® | innovative medical

We deliver better systems for the point of care.

For nearly 40 years, we have designed and delivered point of care solutions built around how healthcare teams actually work.

From medical carts and workstations to clinical furniture and supporting technologies, we help healthcare organizations create smarter, more efficient care environments.

Designed around your environment.

No two care environments operate the same way. We take the time to understand your workflow, user preferences, and clinical priorities before recommending a best-in-class solution.

By combining the right equipment, furniture, and technology, we create environments that integrate seamlessly into daily operations and support how your team works best.

Medical Computer Carts

Overview.

The best computer cart is the one clinicians want to use. By evaluating workflows, technology requirements, and user preferences, we help healthcare organizations select and configure solutions that improve usability, support EMR access, and fit naturally into daily care delivery.

Powered

Non-Powered

Laptop

Tablet

Telehealth

IT Peripherals

Built for the way care happens.

Tailored to your workflow
From cart platforms and power systems to peripherals, accessories, and ergonomics, we create solutions that fit the way your teams deliver care.

Built for long-term performance
Proven solutions selected for their durability, reliability, and ability to support healthcare workflows for years to come.

Support throughout the lifecycle
From planning and deployment to troubleshooting and preventive maintenance, our team provides ongoing support to help ensure long-term success.

Solutions for every point of care.

Whether documenting at the bedside or connecting patients through virtual care, our portfolio of computer carts supports EMR access wherever care happens. With a wide range of cart platforms and custom configurations, we help ensure clinicians have the right technology at the right place and time.

Labor & Delivery Carts

Overview.

L&D environments require equipment that performs through constant use, frequent movement, and repeated cleaning. Our cart solutions are built for that reality, with durable construction, flexible configurations, and easy cleaning practices. Our specialized team works with you to recommend configurations and finishes that support your workflow, preferences, and space.

Bassinets

Bathinets

Delivery Carts

Fetal Monitor Carts

Bedside Cabinets

Overbed Tables

Supply Carts

Cabinets & Customs

Built for the way care happens.

Durable construction for the medical environment
Stands up to harsh daily use and repeated cleaning with all healthcare-grade solutions except 100% bleach (Antimicrobial only).

Unmatched customization
Our team works with you to recommend custom configurations that support your workflow, preferences, and space.

Backed by a 10-year warranty
Antimicrobial finishes are backed by a 10-year warranty for continued reliability (5-year on Laminate and Thermofoil).

Designed with the entire room in mind.

A cohesive patient room starts with furniture that works together. Coordinating finishes, materials, and configurations across your furniture helps create a more connected, organized environment for patients, families, and caregivers.

Medical Carts

Overview.

No two departments work exactly alike. That's why our medical cart solutions are designed to be highly configurable, allowing you to tailor storage, organization, and mobility to your specific needs. From cart size and drawer layouts to accessories and locking systems, our team helps create a solution that supports your workflow today and as your needs evolve.

Anesthesia

IV Therapy

Critical Care

Emergency

Isolation

Med-Surg

PPH

Procedure

Built for the way care happens.

Durable construction for the medical environment
Built with a precision-welded steel base, pyramid shaped frame, and solid HDPE panels for lasting stability and performance.

Unmatched customization
Our team works with you to recommend custom configurations that support your workflow, preferences, and space.

Backed by a 10-year warranty
Non-powered med carts are backed by a 10-year warranty for continued reliability (3-year parts and labor on powered carts).

Finding the right solution starts here.

Healthcare organizations need solutions that balance standardization with flexibility. Avalo carts provide a unified platform that can be deployed across multiple departments, creating consistency throughout the facility while allowing each area to tailor configurations to its specific workflow and clinical application.

Wall Mounted Workstations

Overview.

By considering room layout, workflow, and ergonomic preferences, we help create workstation solutions that provide comfortable access to technology at the bedside. With proven workstation platforms, flexible mounting options, and a wide range of accessories, we help create solutions that support efficient documentation and long-term usability.

Wall Arms

Monitor Arms

Wall Cabinets

Anesthesia Machine Workstations

Built for the way care happens.

Tailored to your space
From flush-mounted solutions to a variety of extension lengths, we help configure workstations that fit comfortably within your environment.

Ergonomic by design
Designed to support comfortable documentation, improved mobility, and more natural interactions between clinicians and patients.

Built for long-term performance
Proven solutions that deliver reliable performance and durability in demanding healthcare environments for years to come.

Flexible for every care environment.

Whether supporting patient rooms, hallways, nursing units, or specialty care areas, our wall mounts are designed to maximize space while maintaining comfortable access to technology. With a wide range of models, configurations, and accessories, we create solutions that fit the needs of any environment.

Healthcare Furniture

Overview.

Healthcare furniture should do more than fill a space. It should support patient comfort, withstand years of daily use, and contribute to a cohesive care environment. Our carefully selected solutions combine durable construction, thoughtful design, and extensive customization options to help healthcare organizations create spaces that are functional, welcoming, and built to last.

Bedside Cabinets

Cabinetry

Seating

Overbed Tables

Built for the way care happens.

Durable construction for the medical environment
Engineered to deliver lasting value in environments where durability and dependability matter most.

Unmatched customization
Choose from a wide range of finishes, styles, and configurations to create spaces that align with your operational, aesthetic, and patient care goals.

Designed for complete room solutions
From bedside furniture and overbed tables to seating and headwall cabinets, we help create coordinated environments throughout the patient room.

Designed to work together.

A well-designed healthcare environment starts with furniture that works as a system. Coordinating finishes, materials, and configurations across patient rooms and care spaces helps create a more cohesive experience for patients, families, and caregivers.

Custom Solutions

Overview.

When standard products aren't the right fit, our team collaborates with you to develop solutions tailored to your workflow, equipment, space, and operational requirements. From initial concept through deployment, we help transform unique challenges into practical, purpose-built solutions designed to support long-term success.

Built for the way care happens.

Collaboration from day one
Every custom solution begins with a deep understanding of your workflow, equipment, environment, and goals.

Designed around your requirements
Our team develops tailored concepts and mockups to ensure the final solution aligns with your needs and expectations.

Support through every phase
From design and production to deployment and ongoing support, we remain engaged throughout the lifecycle of your solution.

Solving complex challenges.

Healthcare environments are constantly evolving. Whether adapting to space limitations, specialized equipment, or unique workflows, our custom solutions help bridge the gap between standard products and real-world requirements.

Virtual Care Solutions

Overview.

No two virtual care programs look exactly alike. They require flexible, integrated, and modular solutions that support clinicians, patients, and evolving care models. Our virtual care offerings combine scalable software, advanced audio and video technology, and flexible deployment options to help healthcare organizations deliver efficient, connected care across a wide range of applications.

Built for the way care happens.

Flexible by design
Modular software and hardware solutions allow you to deploy the capabilities you need today while maintaining the flexibility to grow and adapt over time.

Built around your workflows
Seamless EMR integration, customizable configurations, and multiple deployment options help align technology with the way your teams deliver care.

Support beyond implementation
From installation and training to ongoing optimization and support, our team helps ensure successful adoption and long-term program success.

Technology that grows with you.

Whether supporting telehealth visits, virtual rounding, telesitting, or remote patient engagement, our virtual care solutions provide the foundation for connected care delivery. Flexible software, scalable hardware, and seamless integrations help create programs that grow alongside your organization's needs.

Service and Support

Overview.

What's included:

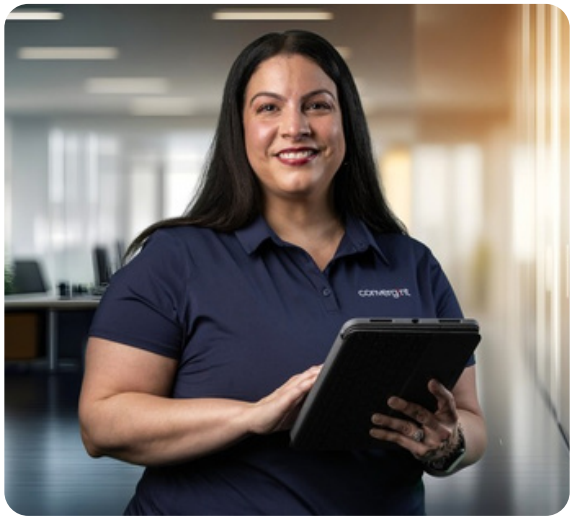
- Consulting & advisory
- Virtual demonstrations
- Customized solutions
- Onsite demo units*
- Remote troubleshooting support
- Warranty coverage
- Lifetime support

We also offer:

- User training
- Unpacking, setup and installation
- Technology integration
- Onsite service and repairs
- Preventive maintenance programs
- Extended warranties

At Convergint, service is more than a core value. It's our way of life. We are guided by a simple belief: **We expect to be our customers' best service provider**. From consultation and solution design to lifetime support, we provide the expertise and guidance healthcare teams need before, during, and long after deployment.

As a division of Convergint Technologies, we combine global scale with local expertise to help healthcare organizations plan, deploy, and support point-of-care solutions with confidence. From consultation and implementation to training, maintenance, and ongoing support, our team is committed to building lasting partnerships and delivering dependable service throughout the life of your investment.



*Onsite demo units may be provided for qualifying volume opportunities and custom projects
