

Medical Grade AIOs

Overview.

Medical-grade all-in-one computers combine the display and computing hardware into a single, streamlined device designed for healthcare environments. With fewer components to install, clean, and maintain, they create a more organized workspace while delivering the performance clinicians depend on every day.

Available in 22" and 24" models, along with medical-grade displays (without computing power), these solutions provide exceptional image quality, durability, and easy integration into carts, wall mounted workstations, and other point-of-care applications. For mobile workflows, select models can also be configured with up to three hot-swappable batteries, delivering continuous battery power throughout the workday.

Built for the way care happens.

Streamlined design

Reduce clutter by combining the monitor and computer into a single device that is easier to deploy, clean, and maintain.

Medical grade reliability

Built for continuous operation with durable construction and easy-to-clean surfaces that are UL60601-certified.

Flexible Integration

Designed to integrate with medical carts, wall mounted workstations, and custom point-of-care solutions across a variety of healthcare settings.

Deployment made easy.

Whether you're upgrading existing hardware or outfitting an entirely new fleet, our medical-grade all-in-one computers simplify deployment with long-term reliability across a variety of healthcare environments.
