

SOLUTIONS FOR HEALTHCARE

TSI Touch provides cutting-edge touch screen solutions that are transforming the healthcare industry. Our advanced interactive displays enhance patient care, streamline hospital operations, and support medical education. By integrating robust technology with user-friendly interfaces, TSI Touch delivers reliable and innovative solutions tailored to the unique needs of healthcare professionals.

ADVANTAGES

- **Durability:** Built to withstand the rigors of healthcare environments with robust construction and reliable performance.
- **User-Friendly:** Intuitive interfaces that are easy for both medical professionals and patients to use.
- **Customizable:** Solutions tailored to the specific needs of healthcare institutions, ensuring optimal functionality and integration.
- **Innovation:** Leading-edge technology that keeps healthcare providers at the forefront of medical advancements.
- **Enhanced Patient Safety:** Features like anti-microbial coatings and shatterproof glass ensure a safer environment for patients and healthcare workers.
- **Scalability:** Solutions that can grow and adapt with the healthcare institution, providing long-term value and flexibility.

FEATURED SOLUTIONS

Interactive Touch Displays for Patient Care

TSI Touch offers high-resolution, multi-touch displays designed for patient rooms, nursing stations, and other clinical environments.

- High-resolution displays, multi-touch capability, and durable construction.
- Enhance patient engagement, improve accessibility for patients with disabilities, and streamline patient check-ins and medical records access.

Touchscreen Tables for Medical Education

TSI Touch offers advanced 3D visualization and virtual dissection tools for medical education.

- High-definition display, responsive touch interface, and seamless integration with educational software.
- Enhance student engagement and comprehension of complex anatomical structures through interactive and detailed visualizations.

Digital Signage for Hospitals

TSI Touch provides customizable digital signage solutions for hospitals, enhancing internal communication and navigation.

- Customizable content, real-time updates, and interactive wayfinding.
- Enhance communication within the hospital, provide clear navigation, and improve patient and visitor experience.

Interactive Kiosks for Self-Service

TSI Touch offers interactive kiosks for self-service applications, streamlining processes and improving user experience.

- Intuitive touch interface, secure data handling, and versatile application support.
- Reduce wait times, improve operational efficiency, and provide patients and visitors easy access to information and services.

Collaboration Displays for Medical Teams

- *TSI Touch provides collaboration displays designed to facilitate teamwork and communication among medical professionals.*
- Multi-user touch capability, high-resolution display, and seamless integration with collaboration software.
- Facilitate remote consultations, enhance team collaboration, and support efficient decision-making in medical environments.

Protective Solutions for Healthcare Environments

TSI Touch also offers protective solutions for displays used in healthcare settings, ensuring durability and safety.

- Anti-microbial coatings, shatterproof glass, and robust construction.
- Maintain hygiene standards, reduce the risk of damage, and ensure the longevity of displays in high-traffic areas.
