

Mobile Bedside Sedation Carts

Overview.

Purpose-built for bedside sedation, these mobile sedation carts integrate medication storage, charting, patient monitoring, and telemetry into a single mobile workstation. Originally developed in collaboration with a leading academic medical center, they help streamline sedation workflows, improve efficiency, and support safer patient care.

Designed for clinical workflows.

- SecureCatch™ keyless locking system
- Badge-swipe access control option
- Multiple narcotics storage options
- Keyboard drawer with integrated USB hub
- Slide-out work surface extension
- Lockable, ventilated CPU compartment
- Mounting channels for equipment such as regulators/canisters
- Workflow accessories such as IV poles, sharps containers, cord wraps, etc.

Medical grade durability.

- Infection-control design
- Color-through polymer body panels
- Welded steel and aluminum frame
- Smooth-operating drawers
- 5-year warranty

Powered for mobility.

- 40AH lithium iron phosphate battery
- Multi-LED battery status display
- Steering caster
- Built-in handle
- Hospital-grade power cord and power strip
- Supports displays up to 24"
