

Hemorrhage Carts

Overview.

Our Postpartum Hemorrhage (PPH) Carts are designed in collaboration with labor and delivery departments across the country to provide organized, immediate access to critical equipment during obstetrical emergencies.

Each hemorrhage cart is customized to your facility's preferred supplies, workflow, and clinical protocols. From drawer layouts and locking options to accessories and organization systems, our team works with you to configure a solution that supports rapid response while aligning with Joint Commission standards.

Built for the way care happens.

Designed around your protocols

Every hemorrhage cart is configured to match your supplies, workflow, and emergency response procedures.

Rapid access and organization

Custom drawer layouts, removable trays, and accessory options help clinicians locate critical supplies quickly when time matters most.

Built for healthcare

Precision-welded steel construction, easy-to-clean body panels, smooth-rolling casters, and a 10-year warranty for dependable performance years to come.

Configured for your facility.

No two labor and delivery departments operate the same way. Choose from multiple cart heights, locking options, drawer configurations, and accessories to create a hemorrhage cart that fits your clinicians, workflow, and emergency response protocols.

Trusted partner.
