

Medical Displays & Kiosks

Overview.

We offer a wide range of healthcare display solutions designed to support patient engagement, staff communication, education, and clinical workflows. Whether you're deploying interactive kiosks, digital signage, or protected medical displays, our team can help you identify the right hardware solution for your application and integrate it seamlessly into your environment.

Built for the way care happens.

Interactive healthcare displays & kiosks

Interactive displays designed for patient check-in, wayfinding, telemedicine, education, surgical displays, and digital signage. Featuring healthcare-grade durability and precise multi-touch functionality.

Protective medical displays

Protect standard 24" displays with anti-reflective glass overlays that support infection control, simplify cleaning, and help extend display life in demanding healthcare environments. Medical grade displays also available.

Privacy filter displays

Keep patient information secure with displays that provide a clear front view while blocking side-angle visibility, maintaining privacy in shared clinical spaces.

Designed for every environment.

From patient check-in and wayfinding to medical training and clinical communication, healthcare displays support a wide variety of applications throughout the facility. Our team will help you select the right display technology, screen size, and protective features to ensure long-term performance in your environment.

Trusted partner.
